Peer Evaluation Form for Group Work

Group number Group 14
Your name Student Budget & Expenses Tracker

Write the name of each of your group members in a separate column. For each person, indicate the extent to which you agree with the statement on the left, using a scale of 1-4 (1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree). Total numbers in each column.

Evaluation Criteria	Member: Ayesh Ahmed	Member: Iyinoluwa Olu-Alabi	Member: Arvin Gholipoor	Member: Dexter Sargent	Member:	Member:
Attends group meetings regularly and arrives on time.	4	4	4	3		
Contributes meaningfully to group discussions.	4	4	4	3		
Completes group assignments on time.	4	4	4	4		
Prepares work in a quality manner.	4	4	4	4		
Demonstrates a cooperative and supportive attitude.	4	4	4	4		
Contributes significantly to the success of the project.	4	4	4	4		
TOTALS	24	24	24	22		

Feedback on team dynamics:

1. How effectively did your group work? (List at least 3 things)

Our group communicated well through Discord and group messages. If someone had a problem or question we usually answered quickly and helped each other figure it out.

We divided the work between backend, frontend, and documentation so everyone had something clear to focus on. This made it easier to make progress without stepping on each other's work.

We used GitHub and Jira to keep track of tasks and commits. This helped us see what had been done and what still needed to be finished.

It was also easy to ask for help when someone was stuck. For example, one of the tasks was assigned to Iyin and she was having some trouble with it, and Ayesh stepped in to help and explain what was going on so the task could move forward.

Overall the group was supportive and flexible. If someone finished their part earlier or noticed something needed fixing, they were willing to help out or review other parts of the project.

2. Were the behaviors of any of your team members particularly valuable or detrimental to the team? Explain. (List at least 3 things)

Some team members were very helpful when others were stuck on a task. For example, when Iyin was having some difficulty with one of her assigned tasks, Ayesh took the time to explain what was going on and helped her move forward. That kind of support made it easier to solve problems quickly.

It was also valuable that everyone was willing to communicate and check in about progress. When someone completed something or noticed an issue, they usually let the group know so we could stay on the same page.

Another helpful behavior was that people were generally open to feedback and suggestions. If someone proposed a change or improvement, the group was willing to listen and discuss it instead of just sticking to their own approach.

3. What did you learn about working in a group from this project that you will carry into your next group experience? (List at least 3 things)

We learned that clear communication is really important in group projects. When people regularly update each other on what they're working on, it makes it much easier to keep the project moving and avoid confusion.

We also learned that asking for help early is better than struggling alone for too long. When someone explains something you don't understand, it can save a lot of time and help the group move forward fast.

Another thing I learned is that dividing tasks helps a lot. When everyone knows exactly what they are responsible for, it reduces confusion and makes it easier to track progress.
